

'Better Nuerology'

App Project

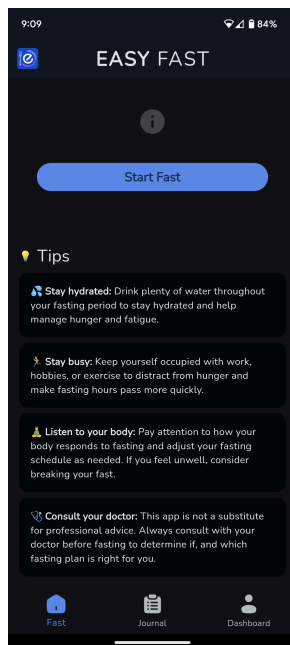

Account Sign Up:

Name, Address, age, height, weight, email & cell phone number.

After Sign Up:

Medications, symptoms, 12 month & 24 month goals.

Once signed up they need to be able to pick a start date. This start date would initiate an onboarding email.

Autophagy List to Pick From

Begginner

24h

48h

72hr

Growth Hormone Fasts

96hr/4d

120hr /5d

144hr/6d

168hr/7d

These are the basic functions we need to launch.

The app we should copy the most is called Easy Fast, it's pretty good. There is a bunch of functions we don't need on it though; We don't need to track electrolytes.

Things we want to track in order of importance.

Total time fasted.

Ketosis.

Zero carb days

Weight
